(184)

die tonliche Umsetzung
der rhythmischen Partitur
des II. Teiles des Klarinettentrios

vgl. auch Tonhöhendisposition des I. Teils

Tonhöhendisposition des II. Teiles aufgrund des Dichteplans (1)

- Idee: ev. bestimmte Tonfolgen an bestimmte Rhythmen koppeln (lt. erster Erscheinungsform)
- Tendenz, Konzept: im Grossen allmähliche Ausdehnung, im Kleinen „tonpoetische" Linearität.
- Prinzip:

- Tempo der Parametermodulation:
- Stimmtausch:
- stets statistisch-komplementärharmonische Verteilung auf alle 3 Stimmen
→ die gleichen Bedingungen wie im I. Teil, aber mit anderem Resultat (Umwertung durch Bewegung statt Statik

	a) Takte (82) – (94)	b) T. (95) – (105)	c) T. (106) – (112)	d) (113) – (125)
	Charakter: Ambitus, Oktavlagen (transponierend)		Zunahme der Dichte	non-direkt. Pendeln
	keine Tonhöhen	Reprise der Anfangstöne des I. Teils	e-	g-
			stets 3 Halbtöne höher	
Abstandslagen			eng	eng - mittel - weit
Melodie-Fortschreitungen (Sprünge/Schritte vorwiegend); Melodie-Richtung (Tendenz mit Ausn.)			klein; ↗	klein - mittel; ↗ ↗ ↘
Dissonanzgrad, harmonische Klanglichkeit (Bevorzugung)			weich-dissonant z.B. gr.2 - kl.3 gr.3 - gr.2	versch.
Begriffsspiegelsymmetrie (gleiche Folge wie in der Tonhöhendisposition des I. Teils)			Tutti (alle Stimmen gleichzeitig komponieren)	individuelle Hüllkurven „frei" ↘
